

The 13 Principles of Success Consciousness

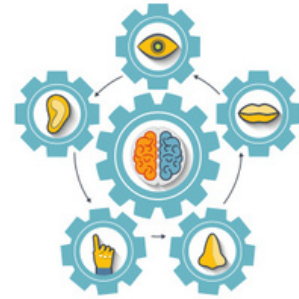

1. DESIRE

Not a mere wish or hope, but a "burning desire" or "consuming obsession".

2. FAITH

Belief in attainment of desire can be developed, by repeatedly affirming and visualizing, with feeling.

3. AUTO-SUGGESTION

Repeated self suggestion using all 5 senses, until your mind accepts it as a fact.

4. SPECIALIZED KNOWLEDGE

Identify and acquire knowledge of the specific product, service or niche you intend to serve.

5. IMAGINATION

Give shape, form and action to desire, using synthetic imagination or combine specialized knowledge with ideas.

6. ORGANIZED PLANNING

Keep creating plans with the help of a Master Mind group, until your plan works. Be a leader in your field.

7. DECISION

Make decisions with definite purpose, and stand behind them with strong desire and faith.

8. PERSISTENCE

To build persistence, strengthen your desire, definiteness of purpose/plans, and positive influences/cooperation.

9. MASTER MIND

Convert knowledge to power by assembling it into plans and taking action, with the help of a Master Mind group (harmonious cooperation by >2 people for a definite purpose).

10. SEX TRANSMUTATION

Sex is the most powerful mind-stimuli. Redirect that energy from physical expression to attainment of your desires.

11. SUB-CONCIOUS MIND

This is the link between your finite mind and Infinite Intelligence. Plant in it any plan, thought or purpose, with positive emotions.

12. BRAIN

Brain = broadcasting station of thought vibrations. The subconscious mind sends thoughts with feelings, and Creative Imagination receives inspiration and "hunches".

13. 6TH SENSE

Access Infinite Intelligence effortlessly, after mastering steps 1-12.
